TCIA CT Colonography
CT volumes
CTSpine1K
vertebral labels
CTPelvic1K
pelvic labels
match each label set to the series it was drawn on
each patient was scanned prone and supine; neither source recorded which
fused
n = 342
separate
n = 351
spine only
n = 89
pelvis only
n = 20
correct the source ground truth
112 spine fixes in 103 cases;
13 pelvic fixes in 12 cases
pseudolabel the missing half, asymmetrically
a pelvis has no enumeration to get wrong; the 20 pelvis-only spines were corrected by hand
1
femora, lower thoracic levels, and the sacrum
2
ribs: Möller's rib net unioned with TotalSegmentator, numbered from it; 152 cases reviewed
3
lumbar ribs as their own class rather than rib 12 (16 cases)
4
surgical instrumentation as its own classes (11 cases)
release gates, in order
affine and sidedness → each rib articulates with the vertebra its number implies → measures in physiological range
802 released records
33 with a consensus Castellvi grade
