Author contribution statement

G.S. designed the dataset and the label scheme, implemented the processing pipeline and the quality-control procedures, and drafted the manuscript. A.S., A.T., M.K., R.C., D.H., F.M., H.S., M.S., S.S., M.M. and J.K. performed annotation correction and quality-control review of the released segmentations under supervision. M.I. and N.A. performed the radiological reads — the Castellvi grading and the adjudication of candidate instrumentation. [BEFORE SUBMISSION: confirm each contribution individually with the author concerned and expand to CRediT roles.] All authors read and approved the final version of the manuscript.

Conflict of interest statement

The authors have no relevant conflicts of interest to disclose.

Acknowledgements

The imaging analyzed here was made available by The Cancer Imaging Archive and by the investigators who published the source annotations. [Funding sources to be listed.]

Data and code availability (unblinded)

Dataset, archived before submission: <https://doi.org/10.5281/zenodo.22139642> (concept identifier, resolves to the current version); the version described in the manuscript is v7, <https://doi.org/10.5281/zenodo.22242745>.

Code: <https://github.com/Gregory-Schwing-MD-PhD/CTSpinoPelvic1K>, tagged at the release commit.

Mirror: <https://huggingface.co/datasets/OpenSpineConsortium/CTSpinoPelvic1K> — a convenience mirror, not the archive of record.

Ethics

This work uses publicly available, de-identified imaging and annotations derived from it. The Wayne State University Institutional Review Board issued a Notice of IRB Administrative Determination of Non-Human Participant Research on 2 September 2026 (WSU IRB HPR Number 2026-269, “Open Spine Consortium: Secondary Analysis of Publicly Available, De-Identified Imaging Datasets and the Derived Annotations, Software, and Models Produced From Them”), finding that the project does not constitute human participant research under the Common Rule at 45 CFR 46 and that IRB review and oversight are not required.
