

Supplementary Material

CTSpinoPelvic1K: spine, pelvis, ribs and femora in one coordinate frame, annotated for lumbosacral transitional anatomy

Figure S S1: Instrumentation in the release, one exemplar each, drawn through bone. (a) Hip arthroplasty, 66, $n = 8$. (b) Femoral-neck screws, 68, $n = 1$. (c) Sacroiliac screws, 67, $n = 1$. (d) Interbody cages, 63, $n = 1$. Bar, 5 cm.

Figure S S2: Spinopelvic measures against standing reference bands (mean $\pm$ SD) [?].

Figure S S3: Records carrying each vertebral level, cranial to caudal. Counts per identifier in Table S1.

Table S1: Held-out fold Dice of the pelvic pseudolabeller against manual CTPelvic1K labels, mean $\pm$ SD over the five folds at each fold’s selected checkpoint (nnU-Net validation Dice, ignore regions excluded; `results/pseudolabel_dice/` in the repository).

Structure	Dice
Sacrum	0.980 ± 0.003
Left hip	0.970 ± 0.016
Right hip	0.971 ± 0.015

Table S2: Data types and metadata, and the records populating each, from the released manifest.

Field	Records	Available
Identifiers and paths, configuration, match type, image/label alignment check	802	100.0%
Patient position, tube potential, section thickness, kernel	802	100.0%
Transitional label and class, annotation origin, instrumentation flags	802	100.0%
Spine series identifier; bone-fraction check	782	97.5%
Scanner manufacturer and model	768	95.8%
Sex	749	93.4%
Age	709	88.4%
Pelvic series identifier	713	88.9%
Castellvi grade (consensus of two readers)	33	4.1%

Table S3: Every identifier populated in the release and the number of the 802 records carrying it, counted from the released label volumes. The identifier space is contiguous, 0–68; 46 and 59 (thirteenth rib pair) occur in no record.

id	class	records	%	id	class	records	%
1	C1	2	0.2	37	rib_left_4	65	8.1
